

# Information on Becoming a Certified Lead Based Paint Renovator or Firm

Beginning in April 2010, renovation, remodeling and repair firms who work in pre-1978 homes will need to be certified through the Environmental Protection Agency, EPA, if they do certain work that disturbs painted surfaces in and outside of the home. This requirement also effect commercial companies who work in pre-1978 schools and childcare facilities. Along with firm certification, an employee supervising the work will also need to be certified as an EPA Certified Renovator. Below is an explanation of the difference between a **Certified Firm** and **Certified Renovator**.

## **Certified Firm**

All remodeling firms doing work in pre-1978 homes are required to have Firm Certification, which is different from Certified Renovator. There are certain activities in pre-1978 houses that are not subjected to the rule and it is important to look at the rule for a better understanding of exempt activities. Firms are required to be certified by April 22, 2010

Firms may begin applying for certification beginning October 22, 2009. To obtain a copy of the "Application for Firms" Click on the "Application for Firms" provided in the Association's Lead Paint section of its website. or visit [www.epa.gov/lead/pubs/renovation.htm](http://www.epa.gov/lead/pubs/renovation.htm). The cost for firm certification paid to the EPA is \$300 and renewable every five years.

## **Responsibilities of Certified Firm**

Certified firms must ensure that:

1. All individuals performing activities that disturb painted surfaces on behalf of the firm are either certified renovators or have been trained by a certified renovator.
2. A certified renovator is assigned to each renovation and performs all of the certified renovator responsibilities.
3. All renovations performed by the firm are performed in accordance with the work practice standards of the Lead-Based Paint Renovation, Repair, and Painting Program.
4. Pre-renovation education requirements of the Lead-Based Paint Renovation, Repair, and Painting Program are performed.
5. The program's recordkeeping requirements are met.

## **Certified Renovator**

A certified renovator must successfully complete an eight-hour initial training course, including two hours of hands on training, offered by an accredited training provider. The course completion certificate serves as proof of certification. Renovators are required to be certified by April 22, 2010.

## **Responsibilities of Certified Renovator**

1. When requested by the homeowner, must use a test kit accepted by EPA to determine whether components to be affected by the renovation contain lead-based paint.
2. Must provide on-the-job-training to workers on the work practices they will be using in performing their assigned tasks.
3. Must be physically present at the work site when warning signs are posted, while the work-area containment is being established, and while the work-area cleaning is performed.
4. Must regularly direct work being performed by other individuals to ensure that the work practices are being followed, including maintaining the integrity of the containment barriers and ensuring that dust or debris does not spread beyond the work area.
5. Must be available, either on-site or by telephone, at all times renovations are being conducted.
6. Must perform project cleaning verification.
7. Must have with them at the work site copies of their initial course completion certificate and their most recent refresher course completion certificate.
8. Must prepare required records.

The certified renovator will be responsible for training other employees and overseeing work practices and cleaning. The training curriculum, which is currently under development by the EPA, will be an eight-hour class with two hours of hands-on training. Both the firm and Certified Renovator certifications are valid for five years. A Certified Renovator must take a four-hour refresher course to be recertified.

Persons seeking to become a Certified Renovator may attend a training program offered by the association, see available date and registration information at the association's website, [www.pghhomebuilders.com](http://www.pghhomebuilders.com) or visit the National Center for Healthy Housing training calendar: <http://www.nchh.org/training/calendar.aspx> for additional dates and locations
